

## **The Main Scenario**

### **User Registration**

1. The customer navigates to the registration page.
2. The system displays the registration form.
3. The customer fills in the required information (email, password).
4. The customer submits the registration form.
5. The system validates the input data (best scenario).
6. The system verifies the email address and activates the user's account.
7. The system displays a confirmation message that the registration is successful.

### **Login**

1. The customer navigates to the login page.
2. The system displays the login form.
3. The customer enters their email and password.
4. The customer submits the login form.
5. The system validates the credentials.
6. The customer is successfully logged in.
7. the system navigates the user to the home page.

### **Place Order**

1. The customer browses the products and adds desired items to the shopping cart.
2. The customer navigates to the shopping cart to review the items.
3. The system displays the items in the cart along with the total price.
4. The customer clicks on the 'Proceed to Checkout' button.

5. The system displays the checkout page with fields for shipping details and payment information.
6. The customer fills in the shipping details and selects the payment method.
7. The customer submits the order.
8. The system validates the order details and payment information.
9. The system generates an order confirmation and sends an email with the order details to the customer.
10. The customer receives the order confirmation, and the order is recorded in the system.
